

The Opportunity

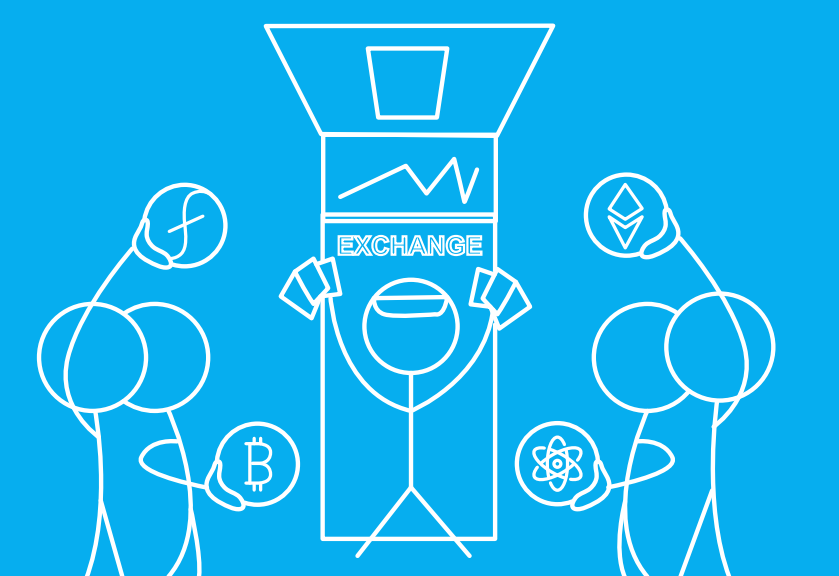

- With **5 Billion** earning less than \$10 a day, there's a massive need for UBI.
- Crypto UBIs have proven this. With **30 Million** users to date.
- Our EOSIO solution, **Freeos**, is already providing **1000x** of value, more than other Crypto UBIs, through our unique price support mechanisms on the blockchain. We have an ongoing sustainable revenue model for the FreeDAO Foundation, founders and investors.
- Initiative Q, a digital currency UBI, attracted **10 Million** and grew by +2 million registrations in 2 weeks, proving the size of this demand.
- Using our DeFi price support systems, we expect to **400k** unique users to Freeos as a Crypto UBI providing income. With a valuable income, we expect the second phase of the project to attract users, and businesses into a digital hub of other services and products, providing additional use cases for the FREEOS token and other upsell opportunities.

Financial NFTs

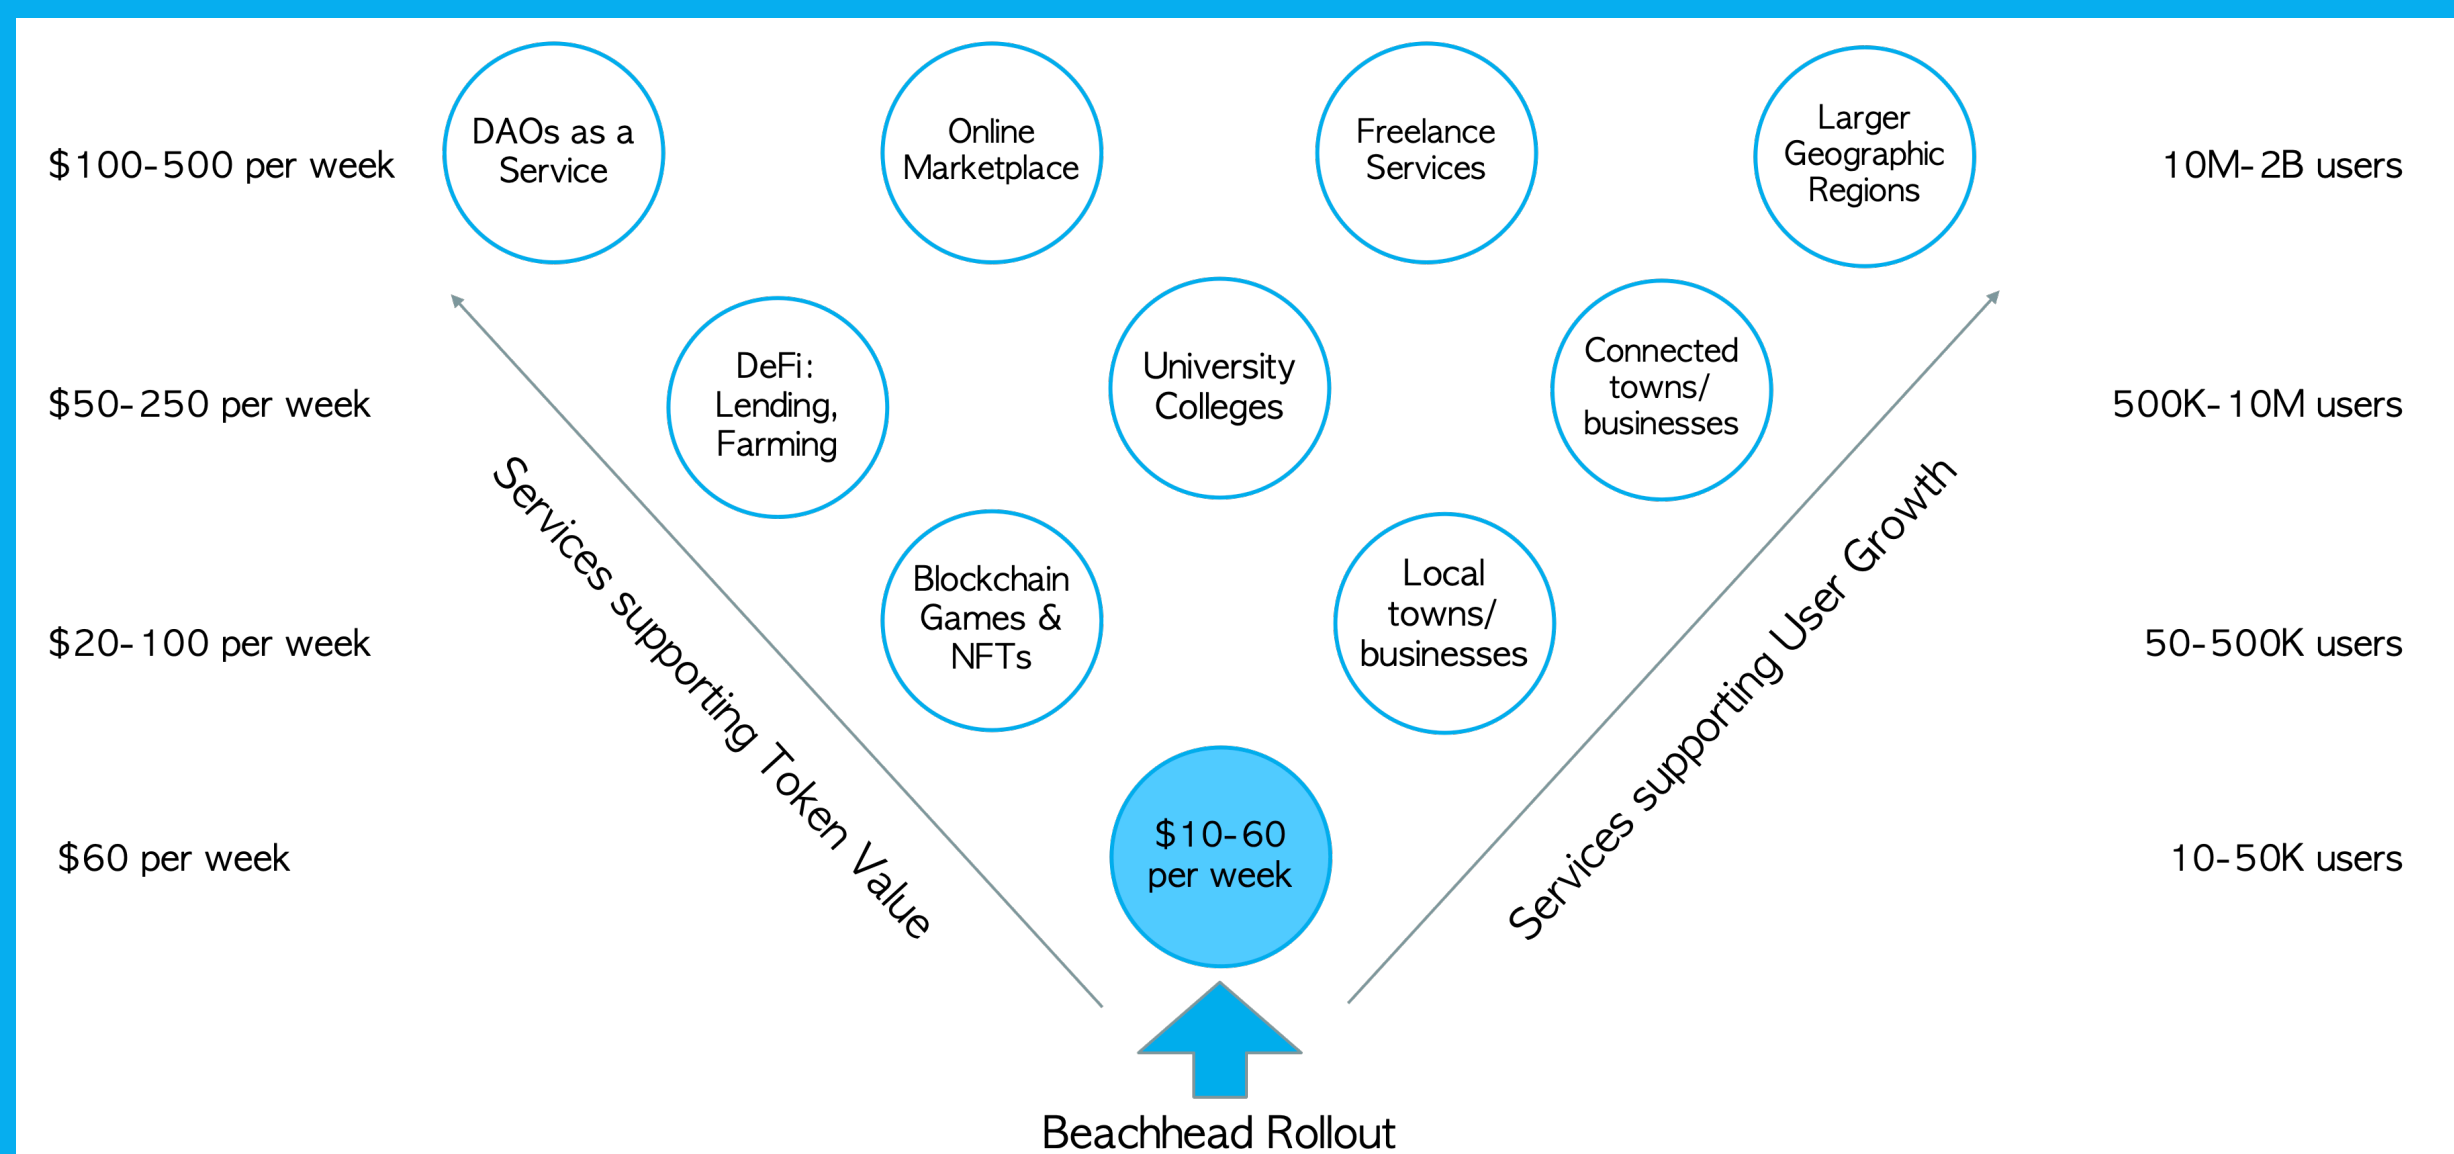

Investor-class, Financial NFTs deliver FREEOS tokens for **1/10th** of the minimum locking threshold value (\$0.0167), giving early investors a price of \$0.00167 USD. Financial NFT delivers FREEOS tokens to the investor weekly, from user-driven minting activity aiming for **10x ROI**.

Ongoing, sustainable & meaningful income is the basis for multiple expansion pathways for multiple vectors of growth.

Revenue

\$1.40 USD per user, per week
